## I can identify alternative 'ai' graphemes.

One day in the month of May a snail made a trail by the lake. A snake was amazed and slid through the rain to see the trail again. The snail had to stay by the lake all day. He could not escape. He was afraid of the snake but he used his brain and lay under some hay out of harm's way. The snake was tame and the snail heard him say, "don't be afraid." The snail strayed from under the hay and they both went on their way.

Add the sausages, beans, spaghetti and fried eggs. Choose a word to put into a sentence. Can you find the alien words?

I can identify alternative 'ee' graphemes.

Down by the sea was an ice-cream shop called Freeze. The shop keeper was a bee called Pete. All day he and his busy team cleaned and shop and completed their tasks. He even had to make green sweets for a mean sheep with smelly feet. "These feet stink!" he cried and with a big leap he buzzed up a tree and never came back.
